

## MAP™ Reports

### Teacher Report (by Goal Descriptors)

Displays teachers class data for current testing term sorted by RIT score.

- 1 Goal Performance:** The columns summarize the students' performance in the goal strands tested in this subject. Data will only show up in these columns if a student took a Goals Survey test. Goal performance of LO means that the student is performing at the 33rd percentile or lower. Goal performance of AV means that the student is performing between the 33rd and 66th percentile. Goal performance of HI means that the student is performing at or above the 66th percentile.
- 2 RIT Score:** The student's overall scale score on the test.
- 3 Standard Error of Measurement:** An estimate of the precision of the achievement (RIT) score. The smaller the standard error, the more precise the achievement estimate is.
- 4 RIT Range:** If a student took the test again relatively soon, the score would fall within this range about 68% of the time.
- 5 Percentile Rank:** The percentage of students in the national norms group for this grade that this student's score equaled or exceeded.
- 6 Percentile Range:** The range of percentile scores corresponding to the RIT range. Similar to RIT range, if a student were to take the test again soon, the score would fall within this percentile range 68% of the time.
- 7 Lexile Range:** A score (displayed as a 150-point range) that can be used to find text of appropriate difficulty. By matching each student's reading skill to books, the Lexile Framework® for Reading can locate the level at which a student is being challenged without being frustrated.
- 8 Test Type:** S/G - Survey with Goals; SUR - Survey
- 9 Mean RIT:** Average score of students in this class for this content area.
- 10 Standard Deviation:** Indicates the variability of RIT scores within this group. A larger standard deviation generally reflects a wider range of scores and achievement within a class.
- 11 Median RIT:** Middle score of this class for this content area.
